

Student Safety Contract for Chemistry

Purpose

As part of your Chemistry class, you will be doing many laboratory activities which require the use of hazardous chemicals. Safety in the science classroom is the #1 priority for students, teachers, and parents. To ensure a safe science classroom, a list of rules has been developed and provided to you in this student safety contract. These rules must be followed at all times. This contract must be signed by both you and a parent or guardian before you can participate in the laboratory.

Note: the student is responsible for his/her own personal safety and is responsible for his/her own actions.

General Rules

1. Conduct yourself in a responsible manner at all times in the laboratory.
2. Follow all written and verbal instructions carefully. If you do not understand a direction or part of a procedure, ask the instructor before proceeding.
3. Never work alone. No student may work in the laboratory without an instructor present.
4. When first entering a science room, do not touch any equipment, chemicals, or other materials in the laboratory area until you are instructed to do so.
5. Do not eat food, drink beverages, or chew gum in the laboratory. Do not use laboratory glassware as containers for food or beverages.
6. Perform only those experiments authorized by the instructor. Never do anything in the laboratory that is not called for in the laboratory procedures or by your instructor. Carefully follow all instructions, both written and oral. Unauthorized experiments are prohibited.
7. Be prepared for your work in the laboratory. Read all procedures thoroughly before beginning the laboratory.
8. Never fool around in the laboratory. Horseplay, practical jokes, and pranks are dangerous and prohibited.
9. Observe good housekeeping practices. Work areas should be kept clean and tidy at all times. Bring only your laboratory instructions, worksheets, and/or reports to the work area. Other materials (books, purses, etc.) should be stored in the classroom area.
10. Know the locations and operating procedures of all safety equipment including the eyewash station, safety shower, fire extinguisher, and fire blanket. Know where the main gas shut off and the exits are located.
11. Be alert and proceed with caution at all times in the laboratory. Notify the instructor immediately of any unsafe conditions you observe.
12. Dispose of all chemical waste properly. Never mix chemicals in sink drains. Sinks are to be used only for water and those solutions designated by the instructor. Solid chemicals, metals, matches, filter paper, and all other insoluble materials are to be disposed of in the proper waste containers, not in the sink. Check the label of all waste containers twice before adding your chemical waste to the container.
13. Labels and equipment instructions must be read carefully before use. Set up and use the prescribed materials as directed in the laboratory instructions or by your instructor.

14. Keep hands away from face, eyes, mouth and body while using chemicals. Wash your hands with soap and water after performing experiments. Clean all work surfaces and materials at the end of the experiment. Return all equipment clean and in working order to the proper area.
15. Experiments must be personally monitored at all times. You will be assigned a laboratory station at which to work. Do not wander around the room, distract other students, or interfere with the laboratory experiments of others.
16. Students are never permitted in the science storage rooms or preparation areas unless given specific permission by their instructor.
17. Know what to do if there is a fire drill during a laboratory period; containers must be closed, gas valves turned off, and any electrical equipment turned off.
18. When using knives and other sharp instruments, always carry with tips and points pointing down. Always cut away from your body. Never try to catch falling sharp instruments. Grasp sharp instruments only by the handles.
19. If you have a medical condition check with your physician prior to working in the lab. Be sure to let your teacher know about any medical condition that may affect your performance in the lab.

Clothing

20. Any time chemicals, heat, or glassware are used, students will wear laboratory goggles.
21. Contact lenses can be worn in the lab when covered by safety goggles. Be sure to indicate that you wear contacts on the back of this form.
22. Dress properly during a laboratory activity. Long hair, dangling jewelry, and loose or baggy clothing are a hazard in the laboratory. Long hair must be tied back and dangling jewelry and loose or baggy clothing must be secured. Shoes must completely cover the foot. No sandals allowed.
23. Lab aprons have been provided for your use and should be worn during laboratory activities.

Accidents and Injuries

24. Report any accident (spill, breakage, etc.) or injury (cut, burn, etc.) to the instructor immediately, no matter how trivial it may appear.
25. If a chemical splashes in your eye(s) or on your skin, immediately flush with running water for at least 15 minutes. Notify the instructor immediately.

Handling Chemicals

26. Do not touch, taste, or smell any chemicals unless specifically instructed to do so. The proper technique for smelling chemical fumes will be demonstrated to you.
27. Check the label on chemical bottles twice before removing any of the contents. Take only as much as you need.
28. Never return unused chemicals to their original containers.
29. When transferring reagents from one container to another, hold the containers away from your body.
30. Acids must be handled with extreme care. You will be shown the proper method for diluting strong acids. Always add acid to water, swirl or stir the solution and be careful of the heat produced, particularly with sulfuric acid.

Student Safety Contract for Chemistry

- Never use flammable liquids anywhere near an open flame or source of heat.
- Never remove chemicals or other materials from the laboratory area.
- Take great care when transporting acids and other chemicals from one part of the laboratory to another. Hold them securely and walk carefully.

Handling Glassware and Equipment

- Never handle broken glass with your bare hands. Use a brush and dustpan to clean up broken glass. Place broken or waste glassware in the designated glass disposal container.
- Fill wash bottles only with distilled water and use only as intended, e.g., rinsing glassware and equipment, or adding water to a container.
- When removing an electrical plug from its socket, grasp the plug, not the electrical cord. Hands must be completely dry before touching an electrical switch, plug, or outlet.
- Examine glassware before each use. Never use chipped or cracked glassware. Never use dirty glassware.
- Report damaged electrical equipment immediately. Look for things such as frayed cords, exposed wires, and loose connections. Do not use damaged electrical equipment.
- If you do not understand how to use a piece of equipment, ask the instructor for help.
- Do not immerse hot glassware in cold water; it may shatter.

Heating Substances

- Exercise extreme caution when using a gas burner. Take care that hair, clothing and hands are a safe distance from the flame at all times. Do not put any substance into the flame unless specifically instructed to do so. Never reach over an exposed flame. Light burners only as instructed by the teacher. Turn gas off at the gas valve on the lab bench.
- Never leave a lit burner unattended. Never leave anything that is being heated or is visibly reacting unattended. Always turn the burner or hot plate off when not in use.
- You will be instructed in the proper method of heating liquids in test tubes. Do not point the open end of a test tube being heated toward anyone.
- Heated metals and glass remain very hot for a long time and can have the same visual appearance as cool metal and cool glass. They should be set aside to cool and picked up with caution. Use tongs or heat-protective gloves if necessary. Determine if an object is hot by bringing the back of your hand close to it prior to grasping it.
- Never look into a container that is being heated.
- Do not place hot apparatus directly on the laboratory desk. Always use an insulating pad or screen. Allow plenty of time for hot apparatus to cool before touching it.

Note: Students will be charged the replacement cost of damaged/broken lab equipment.

- Do you wear contact lenses? YES NO
- Are you color blind? YES NO
- Do you have allergies? YES NO

If so, list specific allergies

Agreement

I, _____, hour _____
(print student's name)

have read and agree to follow all of the safety rules set forth in this contract. I realize that I must obey these rules to ensure my own safety, and that of my fellow students and instructors. I will cooperate to the fullest extent with my instructor and fellow students to maintain a safe lab environment. I will also closely follow the oral and written instructions provided by the instructor. I am aware that any violation of this safety contract that results in unsafe conduct in the laboratory or misbehavior on my part, may result in being removed from the laboratory, detention, receiving a failing grade, and/or dismissal from the course.

Student Signature

Date

Dear Parent or Guardian:

We feel that you should be informed regarding the school's effort to create and maintain a safe science classroom/laboratory environment. With the cooperation of the instructors, parents, and students, a safety instruction program can eliminate, prevent, and correct possible hazards. You should be aware of the safety instructions your son/daughter will receive before engaging in any laboratory work. Please read the list of safety rules above. No student will be permitted to perform laboratory activities unless this contract is signed by both the student and parent/guardian and is on file with the teacher. Your signature on this contract indicates that you have read this Student Safety Contract, are aware of the measures taken to ensure the safety of your son/daughter in the science laboratory, and will instruct your son/daughter to uphold his/her agreement to follow these rules and procedures in the laboratory.
